MATERIAL FORMAT

Providing print ready artwork

Artwork must be supplied in the below formats:

- Artwork File in either high res JPG or PDF
- High resolution images, 300dpi (Your files will be approx. 6-10MB in size)
- Bleed - Full page advertisements required a 5mm bleed on print ready artwork. This ensures none of your ad gets cut off during the printing process.
- Images/Logos etc in CMYK Colour
- We request that you convert your image colours from RGB (digital mode) to CMYK (Colour mode for printing) if your tools allow you to. By doing it yourself, you have maximum control over the results. You may notice a shift in colour when converting from RGB to CMYK. If you do not like the appearance in CMYK, we recommend that you make adjustments while working in CMYK (usually lightening).

In house design material requirements

- The following items are required to produce your artwork by the Artwork Deadline specific to the issue you have booked
- High resolution images, at least 300dpi. (Your files will be approx. 6-10MB in size)
- Your business Logo PNG or EPS preferred, JPG or PDF format
- Your text content
- Any brand guidelines/formats that need to be used when creating your artwork

NOTE: Additional artwork costs of \$50 per hour apply if content is supplied incorrectly/not supplied.

BOOKING CONDITIONS
